## MELKTERT SHOOTERS-MELKTERTJIES

Makes approximately 860 ml

One 375 ml bottle Vodka (you can reduce it to 300 ml if you prefer less kick)

One 395 gram (300ml) tin of condensed milk (use up to two cans to make it thicker and sweeter)

Half of a 375 ml tin evaporated milk

Ground cinnamon to serve

Mix well, using a food processor or whisk, and bottle, or simply pour the ingredients into a 1-litre bottle and shake well.

Keep in the fridge. Shake well before pouring into shooter or shot glasses.

Sprinkle each melktertjie with ground cinnamon and serve chilled.

Melktertjies is really worth it on a winters evening
