

VLUGSOUT PLAASVERVANGER

VLUGSOUT PLAASVERVANGER

If ammonium carbonate (Vlugsout) is not available, baking powder can be substituted in a 1:1, 1:2 or 1:3 ratio. That is: 1 teaspoon baking powder for every 1/2 teaspoon of baker's ammonia (or 1 1/2 teaspoons baking powder for every 1/2 teaspoon baker's ammonia). You can also add some baking soda together with the baking powder
